Summary

Final-year Computer Engineering student with project experience in Java web applications, MySQL databases, and software debugging. Skilled in Java, C++, Python, and object-oriented programming, with knowledge of FastAPI. Interested in backend development and AI-assisted applications. Bilingual in English and Spanish.

Education

B.S. in Computer Engineering **Expected 2027**
Ana G. Méndez University — Gurabo, Puerto Rico
Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Software Engineering, Networks & Security, Computer Architecture, Artificial Intelligence, Machine Learning.

Technical Skills

Programming: Java, C++, Python, JavaScript, SQL, HTML, CSS, Excel VBA.
Frameworks & web technologies: FastAPI, Jakarta Servlets, JSP, JDBC.
Backend & databases: MySQL, relational database design, SQL queries, views, triggers, stored procedures, authentication, role-based access control, DAO pattern.
Tools & platforms: Git, GitHub Actions, Supabase, Linux, Apache Tomcat, VS Code, Unity.
Practices: Object-oriented programming, modular design, debugging, technical documentation.

Technical Projects

Fragrance Library — Live Web Application *First published Oct. 2026; ongoing*

- Develop a JavaScript application with Supabase accounts, private collections, wishlists, catalog search, and automatic saving across devices.
- Integrate seller pricing to estimate collection value by bottle size and concentration; maintain catalog and pricing workflows with Python, SQLite, and GitHub Actions.

MiniAmazon E-Commerce Web Application *Apr. 2026 source snapshot*

- Built a Java web application with Jakarta Servlets, JSP, MySQL, HTML, CSS, and Apache Tomcat; implemented authentication, access roles, product management, shopping carts, and order processing.
- Used the DAO pattern to organize database operations; debugged application and deployment issues.

Java Casino Simulator & Banking System *Academic project*

- Built account management, deposits, withdrawals, and balance tracking alongside game logic, random outcomes, betting controls, and input validation using object-oriented design.

AI Room Redesign & VR Visualization Prototype *Academic project*

- Designed an image-based room redesign workflow; explored Unity, VR interaction, object manipulation, and modular components for AI-assisted visualization.

Professional Experience

Busser / Food Runner — Upscale Restaurant **July 2026–Present**
Puerto Rico

- Coordinate with servers and kitchen staff to support accurate, efficient service in a busy restaurant.
- Prioritize tasks, respond to guest needs, and adapt to changing demands through communication and teamwork.
